A force for positive change in the design / construction industry

1/04/2013 – Latest Unemployment Figures Get Worse for Construction, Stagnant Overall

The Department of Labor released the final numbers for 2012 which showed that December's unemployment level stayed at 7.8% overall, and the construction unemployment figure got worse by over one percent going from 12.2% to 13.5% in December. For a general view of the unemployment trend see CIRT's 2012 "Workforce Statistics" table.
